From the beginning,
Chiropractors have
searched for a
miracle that would
guarantee a high
level of success in
everything that they
wanted to do.
Something that
would ensure
personal
happiness—a simple
way to make all
hopes and dreams
come true.

If you want more health, get health consciousness.

More power; get power consciousness.

More happiness; get happiness consciousness.

Live it as if it were, because you already have it.

Much gathers more and loss gathers loss.

All of our experiences in life are the result of our predominant attitude. The attitude of mind depends upon what we think. Therefore, all of our achievement depends upon what we think.

We must BE before we can DO, and, we can DO to the extent that we are and what we are depends on what we think.

The world without is a mirror of the world within. What comes to us in the world without, comes from the world within. All possession is based on consciousness. We are related to the world without by the objective mind. The brain is the organ of the mind.

We are related to the world within via the innate mind. This system of nerves presides over all subjective sensations, such as joy, fear, love, emotion and imagination. It is through innate that we are connected with Universal mind and brought into relation with the universal constructive forces.

Our future is entirely under our control by coordinating both conscious and innate, and by understanding their function—which is the secret of life. We can bring objective and subjective minds into conscious cooperation and coordinate the finite with the infinite. There is but one principle pervading the entire universe, occupying all space and being the same at all points of its presence. There is but one mind and one consciousness able to think and it follows your consciousness and is identical with Universal consciousness. Universal mind is potential energy. Each individual is the individualization of the universal.

The ability of one to think is their ability to act on universal and bring it to manifestation. Human consciousness consists of our ability to think.

There are two modes of operation of the mind: one, conscious, and the other, innate. Of these two, the outward is the conscious mind using the five senses. The interior power is the innate mind. Besides the mental function, it controls that which makes life possible in the body.

To the degree that we cease using the conscious; life gets easier. Innate inspires us, controls memory, and does things the conscious mind has no capacity to do. You can reverse your conditions in life. When you control your conscious mind correctly, it directs innate mind. Innate is instinctive. Conscious mind is reasoning. Innate relies upon the conscious mind for direction. Innate perceives by intuition, thus it is quite rapid. Innate never sleeps, never takes a day off. By stating anything to innate mind, certain things are accomplished. Forces are sent into motion to get results. Those that trust and depend on innate find that miracles do happen. Innate does not judge. If we make the wrong suggestion, we can reverse it by saying, "Cancel, Cancel" and suggest something counter to that. Innate has to do with the vital processes restoring health and the desire to improve conditions; it also is the storehouse for memory.

On the spiritual side, innate is the source of imagination. We can understand our source of power. How can Innate change conditions?

Innate is part of the Universal mind; it is creative. Directing our conscious thought, we set in the forces of the Universal mind. Law, the law of attraction, which will bring your suggestion into manifestation, governs this process.

Thought is cause and experiences of life are the effect. Thought received by the brain is subjected to our reasoning. When the captain (conscious mind) is satisfied, the thought is true, it is sent to the crew (innate mind), to be brought into the environment as reality. Innate does not judge, it acts; it accepts the conclusion of the captain. This is where the finite becomes the infinite and the universal becomes individualized. It can accomplish whatever it is directed to accomplish, and here is the significance of the conscious mind. Innate will carry out what was suggested by the conscious mind (the captain). It is our attitude towards life, which determines our environment. We get what we expect.

Demand more and receive more....

The way to make a desire impression is to say it, mentally concentrate on it, visualize it and act the part. Innate mind is a part of the Universal mind. Universal is the creative part of the universe. This creative power is unlimited. Innate responds to our conscious will, thus our creative power of the universe is controlled by the conscious mind. Say what you desire and how you obtain it is none of your business—you cannot control that. The Universal mind is the life principle of every atom in existence. All are intelligent. To change effects, you must change the cause. To remove discord, we must remove the cause and that is the world within.

Exchange poverty for abundance, wisdom for ignorance, harmony for discord and there is nothing better. It all depends on your consciousness.

How you think and what you do or feel, are an indication of who you are. Thought is energy and energy is power. As you say, “I think, or I will go, or I anything”, “I” is the spiritual and the source of the real power. “I”, is the command. The greatest power is the ability to think.

“I can, I will, I must”, is a strong affirmation to strengthen our will. Every time you repeat this, realize what “I” is and understand what “I” is.

When you learn to control yourself, you will have found the world within which controls the world without. The world within is controlled by the “I” and this “I” is a part, or one with Spirit or God. This isn’t just an idea but a fact that has long been established by B. J. Palmer and others. This is not new. The Bible says, “*Know ye not that ye are the temple of the living God?*”

Here then, is the finding of the creative power of the world. The infinite is not poor, nor should we be poor, but to get is to give. We must serve. The more we give, the more we get.

Thought is divine, spiritual and creative. It is evident in order to express power, abundance or any other constructive purpose, the emotions must be called upon to give feeling to the thought so that it will take form.

This is accomplished through exercise. Mental strength is secured in exactly the same way that physical strength is secured.

At least 90% of our mental life is innate. Those who fail to make use of their power live very narrow lives. Innate can solve any problem for us if we know how to direct it. Innate is always at work. Do we direct the work consciously?

We are the result of our past thinking and we will be what we are thinking today. The law of attraction is bringing to us not the things we should like, but it brings us the things that we have created by our thought processes, conscious or unconscious. Make a picture of what you want, and see it in its completion. Mind in action is thought; matter is powerless; mind is force; every form of matter is some pre-existing thought.

Thought shapes and controls matter. Thought works no magic. It obeys law, it sets natural forces in motion; it manifests in your conduct and actions, and your entire environment. You originate thought, and since thought is creative, you can have the things that you desire.

Thought is a product of the mind; mind is creative.

“Know ye not the body is the temple of God”, and
“I” is given control.

It is important to know what not to do, as what to do. Some of the faithful realize their ideals seem to fail, why? You are not limited as to cost or material, only you place a limit on yourself.

Man has believed in an invisible power all through time. We may individualize this power and call it, “Great Spirit”, “Wanka Tanka”, or “God”, but it permeates every crack and crevice and it is a thinking stuff. Things come about in a manner that man’s intellect has no idea about. You are free to use your education, with all its misconceptions and limitations, or you may use Innate mind and all of its potential.

Visualization is the process of making mental images, that when fully believed will be the pattern for creation. The pattern must be clear, with no limits and totally complete. Supply will follow the demand; you can have it all, but you can’t have everything. Idealization is the primary step. It is the plan on which you are going to build. Picture in your mind what you want; you are sowing the seed, but before sowing the seed, you want to know what the harvest will be. This is Idealization.

Visualization is powerful. You must see the picture; see all the details. And finally, manifestation will be accomplished. If you follow directions, you will develop the faith and confidence that will lead to endurance and courage.

The reason people fail in this is that they can't bring the law into operation. The problem is that they are dealing with externals. They want money, power, and abundance and fail to realize that they are dealing with effects and will come only when the cause is recognized.

Walk by faith, not by sight. Give no thought to externals. Make the inner world beautiful and opulent; the outside world will express that which you made within.

What is the principle we speak of? Focus on things you truly want, not on things you don't want. Think abundantly.

The idea steadily held then, is, what attracts the conditions for fulfillment?

You can choose whatever you think, but the results of your thought are governed by law. If you think constructively, results are good. If you think destructively, things will be bad. There is one law, one principle. The result of our action and thought indicates the result of our action. We comply or not comply with this law.

Analyze every thought. The ideal steadily held is what predetermines and attracts the conditions for fulfillment.

Wealth should not be desired as a means to an end, but the means of accomplishing an end. The law of attraction allows the world without to correspond to the world within. To control thought is to control environment, conditions and destiny. How do we control thought when you think you create thought? If our thought is constructive, we manifest good. If it is destructive, we manifest evil. If you desire a different environment, simply hold the ideal in mind until your vision has been manifested. Give no thought to persons, places or things. The right persons and things will come at the right time.

Any desire will manifest by forming a mental picture of success in your mind and consciously visualize your desire. We see only what already exists in the objective world. What we visualize already exists in the spiritual world.

The Bible says that we have “dominion over all things”, this dominion is established through the mind. The world says, “have, do, be”. The Spirit says, “BE, DO, HAVE”. Be the thing in your mind; soon you will have it. Ease and perfection are gained by repetition. Thought allows us to harness all other natural power, thus, physical energy does not compare with the power of thought.

Innate is omnipotent; there is no limit to the things that can be done. When given the desire to act, **SEEK THE KINGDOM** first.

Thought is the invisible link we use to come into communication with Universal, the finite with the infinite.

Creative power does not originate in the individual, but in Universal, which is the source of everything. The individual is the channel for the distribution of this energy. Thought is the energy by which the law of attraction is brought into action.

Ultimate cause is the search for truth. When we find the truth, we find the cause. When we find the cause, we control the effect. The knowledge of cause and effect is power. To be in control of the human experience, we must see the truth; to seek the cause, every human experience is an effect, and then we must know the cause to control the effect.

For years, man has discussed good and evil. Where are Satan and hell?

God is spirit. Spirit is the creative principle of the universe, man is made in the image of God. Man, therefore, is a spiritual being.

The activity of Spirit is the power to think; thinking is a creative process. When creative thought is for the benefit of humanity, it is said to be good; when creative thought is destructive, we call it evil.

Good and evil are the only words that describe the thought process. The spirit of a thing is that thing; the spirit of you is you. Without the spirit you would be nothing. When you begin to realize the essence of the universal is within yourself—is you, you feel your power. Imagination is your workshop. This power of thought, when recognized and properly used, is the greatest labor saving device ever dreamed. By the help of this power, you can undertake things that seem impossible.

An educated understanding will be of no value, the emotions must be brought into action.

Think and feel.

Thought is a creative vibration and the quality of conditions created will depend on the quality of thought. We must be, before we can do, only in accordance with who we are, and we are, what we think.

Every time you think, you start a , trail of causation, which will create a condition in accordance with the quality of the original thought. You may use your thought constructively, or destructively, but you can't plant a thought of one kind and reap the fruit of another. You are free to use this power as you wish, but pay the consequences.

Creative energy finds no more difficulty doing big things than doing small things. Our predominant thoughts create our conditions. You set causes in motion, which will create a power that will bring the things that you think about, to you.

The secret of prayer is that which we hold in our consciousness for any length of time. It creates a pattern of thought that will create energy that weave into our life.

The Universe is governed by law; that law is cause and effect. The same cause will create the same effect. If prayer has ever been answered, it will always be answered. The answer to prayer is subject to law; law is a science just as gravity is a law. Few people know how to pray. It is said that when you pray, BELIEVE that you have received it and it shall be yours.

Our thinking is our ability to act upon universal substance. What we think is created in our outer world. There is a thinking stuff that permeates every crack and crevice of the universe, and will give me whatever I think I want, or don't want. The more we are conscious of our unity with the source, the greater our power to control our conditions.

Our lives are the end product of our thinking and our attitudes. There is no limit to what the law can do, but you limit yourself by limiting your thoughts. Recognize that all power is from within. No human has more power than any other.

The various forms of disease are manifestations of fear, worry, anxiety, jealousy, hate, etc...

Life is based on constructive and destructive activities.

Our present environment and physical conditions tell us how we can make our future. It tells us how the rate of vibration is constantly changed in our bodies. The law of health is based on the law of vibration. The problem in healing is to increase the inflow and distribution of vital energy through the system. Correcting subluxation and clearing destructive thought, such as fear, hate, etc, does this.

With valuable knowledge and applying it, we can control our future. When we realize everything that exists in our present existed previously in our thinking. If all is not as it should be, let us examine our thinking.

It's the law of vibration that exercises control over the body. Every mental action is a vibration. Change the vibration and you change the nature and quality of form. Find the cause in the world within, change the cause and you change the effect. Every cell in you body is intelligent and will respond to your direction. The cells are creators and will create the exact pattern that you give them.

When perfect images are placed before Innate, the energies will create a perfect body and environment.

Our predominant thought must be that of idealized health and constructive environment.

The first law of success is service.

Make a money magnet of yourself, but to do so, you must figure out how you can make money for others.

We get what we give; we should consider it a great privilege to give.

**INCREASE PEOPLE'S
PERFORMANCE:
PHYSICALLY,
MENTALLY,
AND
SPIRITUALLY.**
